Dear Sir:

In response to the Non-Final Office Action dated January 27, 2003, the following remarks are respectfully submitted.

**IN THE CLAIMS**

Please add new claims 25 and 26:

24 — --25. (NEW) A liquid crystal display device used with a light source, comprising:  
a first substrate;  
a second substrate having first and second surfaces, wherein the first surface is disposed against the first substrate;  
a non-transparent film coated on a periphery of the second surface of the second substrate to substantially block light emitted from the light source; and  
a sheet material disposed between the light source and the second substrate, wherein the non-transparent does not overlap at least a portion of one edge of the sheet material.
